

8-port optical convergence module

Overview

Developed for long distance fiber installations. Equipped with eight SFP+ ports, two additional SFP28 ports and one RJ45 console port for configuration. With AXIS D8308 Fiber Aggregation Switch you can connect multiple Axis devices using fiber midspans over long distances. It also enables easy. Typically ships in 10 day (s) Actual lead time confirmed upon receipt of order. The Cisco ® Network Convergence System 2000 Series (NCS 2000 Series) features a suite of passive modules to accommodate network elements built on the Cisco nLight™ reconfigurable optical add-drop multiplexer (ROADM) node architecture (Figure 1). Featuring a compact design, 8- or 16-port Combo PON with GPON, XGS-PON, and Combo G/XGS-PON support, as well as. The ClimatePartner certified product label confirms that a product meets the requirements for the five steps in climate action including calculating carbon footprints, setting reduction targets, implementing reductions, financing climate projects and communicating transparently to continuously. With eight GPON SFP ports and two SFP+ ports, the UF-OLT 8-Port GPON Optical Line Terminal from Ubiquiti Networks offers enhanced connectivity with support for up to 1024 concurrent clients at distances of up to 20 km. Once configured, this line terminal device supports upstream data transfer rates.
