

## Are communication optical cables worth dismantling

### Overview

These cables, originally installed to support communication networks, become obsolete due to technological advancements. Salvaging them provides a way to recycle valuable materials, such as glass and metals, while reducing waste. They last decades longer, meaning less junk piling up in our. Fibre cable salvage involves recovering and repurposing old or decommissioned fibre optic cables. Nobody can do an estimate that's 100% accurate, and being careful to ensure you have enough components to finish the job is really important, especially in an era of supply chain uncertainties and long. It may be useless to someone who doesn't have the tools to terminate, but whoever buys it will be someone working with fiber and owning the tools. 1000 foot rolls are rarely terminated.
