

## Can an N9 router be used with a telecom fiber optic cable

### Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. NETGEAR routers and mesh WiFi systems, including Orbi Mesh WiFi Systems, Nighthawk Routers, and Nighthawk Mesh WiFi Systems, are compatible with any Internet service provider (ISP). Instead of a modem, fiber connections require an Optical Network Terminal (ONT), a device that converts fiber signals into an Ethernet connection. This guide will break down everything you. AT&T Fiber uses a specialized network architecture that may differ from traditional cable or DSL connections. It typically relies on a combination of a fiber-optic cable and a gateway device, which serves as a modem and router in one.

## Article Content
