It is the most well-known SFF (Small Form Factor) connector in the fiber optic industry. 11ax Wi-Fi Standard, named Wi-Fi 6, is known for having several advancements, such as improved performance and efficiency, faster speeds, better coverage, and reduced latency. The multiple access system is Orthogonal Frequency Division Multiple Access (OFDMA) with Multi-User. The emergence of Beyond 5G (B5G) networks introduces novel challenges related to interference management, particularly within the context of Multiple-Input, Multiple-Output (MIMO) and Code Division Multiple Access (CDMA) technologies. This document focuses on high speed layout guidelines relating to USB, USB Hubs, HDMI, DisplayPort®, PCIe, and SATA.
