

Cutting-edge technologies of intelligent PDU

Overview

Unlike traditional power strips, intelligent PDUs come equipped with advanced features that enable real-time monitoring, control, and management of power usage. Our platforms are engineered to elevate your operations, merging cutting-edge technology with uncompromised performance. Panduit PDUs stand as the cornerstone of your equipment in data centers, offering a metric encryption, validated and hardened with multiple security scanning tools and Ethernet. Our comprehensive range of Smart nVent iPDUs, is designed to transform the way you manage power in your data center. nVent is the world leader in OEM smart iPDU design and manufacturing. These advanced devices address critical challenges, such as power supply failures, high energy consumption, and the need for precise thermal management.
