

Dimensions of Telecommunication Shelters for Rail Transit Use

Overview

Our secure, long-lasting telecommunication shelters range in size from 6 feet by 8 feet to 12 feet by 28 feet so that they can fit any scope of project or job. At CellSite Solutions, we're proud to provide a wide selection built-to-spec remanufactured shelters for telecom projects. Our shelters can be shipped nationwide. When designing rack spacing, we follow guidelines provided by the Electronics Industries Alliance / Telecommunications Industry Association (EIA/TIA) and space all racks at 19" or 23" intervals. Our engineered protective building solutions comply with current editions of IBC, UBC, SBC, BOCA, NEC, ACI. Precision Quincy Industries (PQI) Rail-Transit are built for durability and low maintenance withstand the extreme railway environment. Constructed of corrosion resistant 14-gauge stainless steel or .187" aluminum, as well as stainless steel door hinges with grease fittings for lubrication. Infrastructure services for the installation and maintenance of telecom towers have witnessed significant growth in particular for emerging economies, providing the much needed network cov tention is drawn to the countless number of.
