

Dominican Republic Integrated Power Distribution Box Platform

Overview

In the Dominican Republic, there are three distribution companies. The government owns two of them, EdeNorte and EdeSur, through the CDEEE (50%) and the Fondo Patrimonial de las Empresas (FONPER). Electricity coverage (2006) 88% (total), 40% (rural); (total average in 2007: 92%) Installed capacity (2006) 3,394 Share of fossil energy 86% Share of renewable energy 14% (hydro) Overview The power sector in the Dominican Republic has traditionally been, and still is, a bottleneck to the country's economic growth. A prolonged electricity crisis and ineffective remedial measures have led to a vicious cycle. The power sector in the Dominican Republic is dominated by thermal units fired mostly by imported oil or gas (or). At the end of 2006, total installed capacity of public utilities was 3,394. Distribution networks cover 88% of the population, with about 8% of the connections thought to be illegal. Government plans aim to reach 95% total coverage by 2015. Service quality in the Dominican Republic has suffered a steady deterioration since the 1980s. Frequent and prolonged blackouts result mainly from financial causes (i.e. high system losses and low bill collection) t.
