

Electrical Regulations for Primary Distribution Boxes

Overview

This booklet (SP-1099) outlines NYSEG's minimum equipment specifications, and minimum installation requirements for a CUSTOMER constructed primary voltage (2400 Volts to 34500 Volts) distribution line which serves a single CUSTOMER and is located on private property. Essential Guidelines for Safe and Compliant Electrical Systems Think of your home's distribution box as the Grand Central Station of your electrical system. Just like travelers need clear pathways and safety protocols, your electrical circuits need proper management to prevent chaos. These regulations are contained in §§ 1910. 302 through. The following instructions and specifications are intended to set forth the general practices and procedures to be followed in connection with customer primary and high voltage installations. It does not apply to extensions. bond to their equipment ground. Three-wire service equipment is NOT permitted on a 35kV Primary S or designated representative. All items requiring CNP approval shall be submitted to the CNP Manager of Power Quality Engineeri wo (or more) separate services.
