

Fiber optic router displays loss

Overview

When the signal quality degrades, it could be a sign of attenuation or excessive loss in the system. Use an Optical Time Domain Reflectometer (OTDR) to identify where the signal loss occurs. What Does the LOS Light Indicate?

The LOS light on your router indicates the status of your internet connection to the Internet. Fiber optic networks are celebrated for their speed and reliability, but even the best systems can encounter problems. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. These high-speed, high-capacity communication networks are increasingly replacing copper cables, offering superior performance and. Many fiber internet problems come from dirty connectors or loose plugs, not major faults. It can also break your connection. You should fix it fast to get speed and stability back. Each step helps you find problems and fix.
