

French fiber optic cable pile

Overview

A coordinated attack on fiber optic cables disrupted multiple telecommunication services in France overnight. Major providers, including SFR, Free, and Alphasud, reported network outages and degraded performance, impacting both fixed-line and mobile users. The attack comes a few days after a coordinated arson assault on the French rail network. A spokesperson for Iliad, Free's parent company, indicated that six of the 101 French districts were affected by the slowdown. | Cameron Spencer/Getty Images PARIS — A second attack on key French. Paris (AFP) - France was on Monday probing the possible involvement of ultra-left movements in attacks that paralysed the rail network at the start of the Olympic Games, as new sabotage acts affected fibre optic cables in several areas. It is unclear who or what group could be behind these acts and whether they are related.
