

H3C Switch Core Binding MAC

Overview

1. H3C switch port and MAC address binding: Use the special `am user-bind` command to complete the binding between MAC address and port. The command is as follows: `am user-bind mac-address 00e0-fc22-f8d3 interface Ethernet 0/1`. The device prevents user spoofing attacks by using an IP-MAC binding table to filter out illegitimate packets with forged source IP addresses or MAC addresses. The device uses the binding entries to match an IP address with a MAC address.

Page 1 Operation Manual – MAC-IP-Port Binding H3C S3610&S5510 Series Ethernet Switches Table of Contents Table of Contents Chapter 1 MAC-IP-Port Binding Configuration. 1 MAC-IP-Port Binding Overview. 1-1.
