

Huawei S310 Aggregation Switch

Overview

The Huawei S310-48P4S is a Gigabit Ethernet switch designed for campus networks, specifically for access and aggregation purposes. It features 48 x 10/100/1000BASE-T ports for high-speed data transfer and 4 x SFP+ uplink ports for high-bandwidth connectivity. ERPS is defined in ITU-T G. The switch may be PoE+ capable. In the industry. It provides millisecond-level protection switching based on link function, which implements backup of uplinks. One switch can connect to multiple aggregation switches through multiple links, signified against DoS attacks and user-targeted attacks. DoS. Based on the next-generation high-performance hardware and software platform, Huawei eKitEngine S310 series switches stand out with features such as intelligent stack (iStack), flexible Ethernet networking, and diversified security control. 5GE/10GE ports for multi-service needs. Enhanced PoE++ powers high-power PDs directly. #HUAWEIeKit #eKitPioneer #Switch.
