

## Is fiber optic or fiber cable better for residential use

### Overview

Fiber is faster, highly reliable, more durable, and great for cloud-based or real-time work. Cable is cheaper to install and more accessible but can get slower during busy hours due to shared bandwidth and asymmetrical speed. Technically, both can reach 10,000Mbps (10Gbps)—cable internet's overall design just needs to catch up with fiber. \*Pricing per month plus taxes for length of. Since cable internet uses infrastructure that has been in place for years, it offers better availability than fiber internet, making installations and maintenance easier. You can recognize cable lines as they are thick due to their protective layer, less flexible and with metal screw-on connectors. Currently, two major broadband technologies dominate the market: traditional cable and lightning-fast fiber-optic networks. cable internet speeds, reliability, and costs to find the best network connection type for your needs. Learn the pros and cons in this guide. This might affect product placement on our site, but not the content of our.
