

## Price of underground drilling for communication optical cables

### Overview

Armored fiber optic cables designed for direct burial cost \$6-14 per linear foot. Conduit systems add \$2-4 per foot but allow future cable additions. HDPE conduits last longer than PVC but cost slightly more. If you install underground fiber, pricing your HDD work right is the fastest way to protect margins without sacrificing win rate. In this guide, you'll get data-driven ranges you can reference in bids, an illustrative cost breakdown, and a step-by-step pricing framework you can hand to your. Directional boring is a trenchless method of installing dark fiber optic cable underground along a predetermined bore path. It uses a steerable drill to create a pilot hole along a preplanned path, then enlarges the bore to pull in the final pipeline. Replacing a water main costs \$30 to \$50 per linear foot or \$800 to \$2,000, depending on the pipe material used and the distance from the home to a water supply.
