

Register an integrated optical power meter and infrared light generator

Overview

Our portfolio of high performance inline fiber optic power monitoring components uses technology that extracts a fraction of light from the fiber without breaking the continuity of the transmitted signal. Optosigma offers a full lineup of laser power meters to measure Continuous wave (CW) lasers as well as Pulsed lasers. Powered by LaserPoint technology, these meters are available as integrated meters that connect directly to a computer's USB port as well as stand-alone power detector heads that. OWL manufactures a complete line of fiber optic power meters with capability ranging from simple optical power and optical loss measurement to complete standards-based fiber optic link certification for both multimode and singlemode fibers, including 10-Gigabit Ethernet! All OWL fiber optic power. AFL is a trusted supplier of optical testing equipment with more than 30 years of experience and tens of thousands of units in use in the field. In this article, learn: What is an optical power meter?
