

Sky Children of the Light NFC Module

Overview

STAR is an NFC (Near Field Communication) technology that is embedded into some of Sky merchandise — in the shape of a star! STAR gives you the ability to make real-life connections and experiences both inside and outside of Sky. Is it possible to get a STAR product but on an NFC Card/Tag?

I'm not sure. I was wondering the same thing and came across this thread, not sure if its still relevant but I was able to copy my Blossom cape STAR Pin to a nfc-ntag215 chip. The STAR pin is just too difficult to read, both on my switch. Below is some information about STAR that can also be found on ThatSkyShop. If you have any other questions, please email littleoreo@thatskyshop. They are embedded in pins, plushes, etc. Scanning the STAR in-game will reveal a magical experience for you and your friends, in addition to serving as an authenticator of the product itself. The Serendipity matchmaking feature should work on PC since it only needs you to. Buy ♥ Sky: Children of the Light White Card Spare Card NFC Data Copy Card Alternative Big Umbrella Bond online today! Dear Sir/Madam, Thank you for visiting our store! The quality of our products is original quality, the price is proportional to the material and it is a very durable product.
