

The fiber optic cable on the router is emitting red light

Overview

Different factors can cause your router's red light to blink. This can be due to a misconfiguration, a loose cable connection, outdated firmware, a service outage, or other issues. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. How to FIX the Loss of Signal Error Is your router's LOS (Loss of Signal) or Optical light blinking red or solid red?

This means your internet is down. Fortunately, diagnosing and resolving these issues doesn't have to be. A red broadband light on a wireless router typically indicates a problem of some kind with the Internet connection, though these issues can vary depending on the make and model of your device. POWER Normal: Solid/stagnant light.
