

The function of the dust cover on the pigtail box

Overview

The Double Seal effect results from a molded-in circular ring in the connector, which corresponds to a mating ring on the lamp. The inner sealing ring covers the terminal area and the outer ring, or dust skirt, seals around the outside area of the lamp plug connection. The UBS (Ultra-Blue-Seal®) system provides true “Plug & Go” modular convenience and reliability for trailer electrical installations. Choose from our selection of dust-tight enclosures, including washdown enclosures, tamper-resistant washdown enclosures, and more. The pigtail is too thin to drill and zip tie. Any suggestions?

I have only a vague. 3 is a safety rating for indoor and outdoor electrical enclosures that specifies a degree of protection against incidental contact, against the entry of solid objects (falling dirt, windblown dust) or water (snow, rain), and against exterior ice formation. 12 is a safety rating for indoor. CURT wiring dust covers keep your vehicle-trailer wiring connectors well protected when not in use. Each cover comes with an attachment strap and a cap to fit over the plug or socket, keeping the terminals safe from dirt, grime and moisture. © 2026 CURT Manufacturing LLC. Dual function for stop-turn tail lights. DOT Light Plug 3-Pin Right Angle Male With Stripped Power.
