

Uruguay liquid-cooled switch withstands high temperatures

Overview

The design of this switch supports inlet liquid temperatures up to 45 degrees Celsius. Cisco is actively innovating in direct-to-chip liquid cooling for high-performance switches, laying the groundwork for solutions that will enable seamless and scalable AI at unprecedented densities. Today's rack switches are rapidly approaching their thermal limits with the jump to 400G, 800G, and. XIAMEN, China, Nov. (Kehua Tech), a professional provider of critical power, renewable energy, data center solutions, announced the its Liquid-cooling Data Center in Uruguay was successfully delivered and officially operated, laying a solid foundation for the expansion. Today, cutting-edge AI computing platforms such as NVIDIA's Rubin are establishing "high-temperature" liquid cooling as the cooling standard for next-generation green data centers. This system is engineered to cool up to 80% of. Networking firm Arista is developing liquid-cooled switches and racks As reported by NetworkWorld and Converge Digest, the company outlined its plans at the recent Hot Interconnects conference and its recent analyst day. In the new retail era, the focus of selling concept has changed from goods to people. Digitization decoupled consumers, merchandise, and stores and then refined their.
