

What is the regulatory body for telecommunications towers

Overview

The Federal Communications Commission (FCC) has been granted authority by Congress to regulate these towers and ensure they do not pose a threat to air navigation. Building new towers or collocating antennas on existing structures requires compliance with the Commission's rules for environmental review. These rules ensure that entities constructing facilities to support Commission-licensed services take appropriate measures to protect environmental and. Legal regulatory bodies that govern telecommunications systems in different countries are as follows. This list contains bodies ensuring effective regulatory role in a territory which is not necessarily a state, but is listed as "territory" or "economy" in the.
